The game has been released for free to allow players to experience the dynamic and explosive online play. The story is set in the Lands Between. After the time of the great war of the human realm, the Lands Between, facing extinction, was preserved with a powerful defensive barrier erected between the human realm and the realm of the gods. However, a mysterious destruction of the barrier precipitated the end of civilization, and the inhabitants of the Lands Between retreated deep into the mountains of central Europe. The tale of the story begins when the human realm's corruption reaches a point that directly threatens the existence of the Lands Between, and a divine being arises to help free the Lands Between, and bids farewell to the human realm to begin his journey. ►

Asynchronous Online Play Player can experience the Lands Between in the same way they experience the rest of the world. However, this journey to the Lands Between is different from the multiplayer online play for these reasons: - Players can only engage in it when others, who have already embarked on the quest, perform the actions required for their character, such as traveling and investigating. - When other players are with you, you share common experience with them. Even if you are not logged into the game, you can easily connect to online play through message and online conversation. - When other players are with you, your participation in the game can be automatically shared. ►

Discover the Scenery and Character The Lands Between is a vast area between the human realm and the realm of the gods, an area where the culture and technology of human civilization developed. Players will experience the Lands Between from the perspective of a human living in this area. Players will be able to go anywhere they want, but because the world is connected seamlessly, some locations will be unavailable when not under the control of any character. Players can freely explore and interact with the other characters and objects in the world. Players can visit the nearly 200 locations in the world and seek out newly introduced content to add more variety. You can also get to know the other characters through social interactions. ►

Create Your Own Character The game supports a wide range of character customization options, from the appearance of armor, weapons, and accessories to the customization of the characters' own special actions. You can freely combine armor, weapons, and magic, and determine your own play style. ►

Dynamic Online Play A dynamic online play that is constantly evolving with an updated system that facilitates the rapid exchange of information between players
